

Judy Lin
Senior Vice President, Ethernet Switching Technology Group
Cisco

Judy Lin is Senior Vice President and General Manager of Cisco's Ethernet Switching Technology Group. In this role she is responsible for Cisco's fixed switching portfolio that generates more than \$6 billion annually and includes the Cisco Catalyst 2000 and 3000 Series families, Metro Ethernet and Industrial Ethernet switches. Cisco's fixed switching portfolio consistently leads the networking industry in market share and performance.

Lin has more than 20 years of experience leading startup and established businesses. Prior to Cisco, she was senior vice president and general manager at Electronics for Imaging, a leading provider of imaging solutions, where she was responsible for its flagship Fiery product line.

Previously, Lin joined VeriSign in 1996 as a founding member of the development team, where she was instrumental in building the technology, infrastructure, and products that led the company to \$1.5 billion in revenue. While at VeriSign, she served as Senior Vice President of product development, IT services, and infrastructure operations and as Executive Vice President and General Manager for the Security Services division. In that role, responsible for worldwide online authentication and payment infrastructure services, her division delivered annual growth in excess of 20 percent and made "Secured by VeriSign" one of the most trusted brands on the internet.

Prior to joining VeriSign, Lin held a variety of software development and management roles at Taligent, Apple Computer, and Hewlett-Packard, where she worked on the Macintosh operating system and HP's first commercial UNIX products.

Lin holds dual bachelor's degrees in computer science and European history from the University of California at Berkeley.
